ABOUT

Hi! I am a design student with a strong inclination toward design as a form of exploration and expression. I'm deeply interested in how ideas evolve through research, experimentation, and hands-on making. I enjoy pushing beyond conventional approaches — a space to question, test, and create new possibilities.

My work often begins with research and develops into visual identities and narratives that feel both intentional and expressive. I see design as a way to make sense of the world and navigate it with curiosity and purpose.
